

Pedestrian Safety Facts

Nationwide

In the United States, a pedestrian is struck by a car every seven minutes. It is estimated that over 5,000 pedestrians are killed and 70,000 pedestrians are injured each year.¹ Pedestrian deaths account, on average, for 18% of all traffic crash fatalities and 3% of all traffic related injuries.²

From 2005 – 2014, more than 46,000 people walking were struck by cars and killed, the equivalent of a jumbo jet full of passengers crashing every month.²

Speed Kills: People struck by cars are more likely to be killed on roads with speeds over 40 mph.

Fatalities	5	8	4	6	8	11

Florida

In 2016, pedestrian deaths in Florida accounted for 9 percent of the national total. Florida leads the nation in the most deaths per capita, and the total pedestrian fatality rate in Florida is the third highest in the U.S.¹

Five Florida metropolitan areas were ranked as the most dangerous places to walk in the nation.³

- 1) Cape Coral-Ft. Myers
- 2) Palm Bay-Melbourne-Titusville
- 3) Orlando-Kissimmee-Sanford**
- 4) Jacksonville
- 5) Deltona-Daytona Beach-Ormond Beach

Florida law is clear

Drivers approaching a pedestrian legally crossing a street at an intersection must yield – slowing substantially or stopping – to allow the pedestrian to cross.

The penalty for failing to yield to a pedestrian in Florida is a minimum fine of \$164 and three (3) points on your driver's license.

Metro Orlando

(Metro Orlando is defined as Osceola, Orange and Seminole counties.)

Metro Orlando nears the top of the list of the most dangerous places for walking because of its high pedestrian fatality rate of 2.6 for 100,000 people, despite only 1.2 percent of the people walking to work.³

On average, three pedestrians are injured every day in Metro Orlando and at least one is killed every week.⁴

The region has made progress with the Pedestrian Danger Index (PDI) dropping 10 points since 2014, moving this region from #1 to #3 as the most dangerous place in the nation for walking.³

Major investments are being made in walking and biking projects aimed at addressing safety and public health. In the next five years, Central Florida will invest \$595 million in the region's pedestrian, bicycle and transit network.⁶

Fast Facts

60% of drivers are yielding on roads **35 mph and lower in Orange County** in 2016 – a jump from 17% in 2012.

21% of drivers are yielding on roads **40 mph and higher in Orange County** in 2016 – a jump from 2% in 2012.

More drivers are yielding to people walking in crosswalks **today** than they were four years ago in the City of Orlando and Orange County.

In the Numbers

19% of pedestrian fatalities nationwide involved **hit-and-run drivers** (2015).¹

14% of pedestrian fatalities in Florida occur in marked crosswalks.⁸ As overall traffic crashes rise, Best Foot Forward is working to stop the upward trend by changing behavior and getting drivers to yield for people in crosswalks.

Pedestrian injury is the **3rd** leading cause of death nationwide for **children 15 and younger**.

21% of pedestrian fatalities nationwide are **children under 14** (2015).¹

45 y/o – the average age of pedestrians killed in Florida and nationwide.²

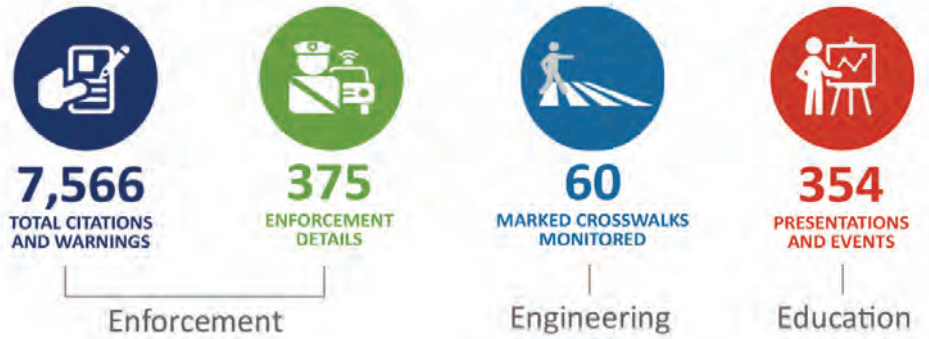

19.5% of pedestrian deaths in Florida were 65 years and older – in line with the national average of 19% (and 18.2% of the total population in Florida is over 65).³

93% of pedestrians killed were Floridians.

96% of drivers striking people were Floridians.
